# FKM SMU EL SCREWING MACHINE CONVERSION

## Conversion of your screwing machines to use electric motors

FKM will convert your combustion-driven screwing machine to use an electric drive. This makes the machine quieter and more environmentally friendly for use in tunnels, subways and urban areas.

**NEW** FC for speed optimization

Simple operation

Low-noise

Environmentally friendly

## ADVANTAGES

- > Simple operation, easy starting
- > No exhaust gas in tunnels
- > Reduced noise exposure
- > Speed regulated by frequency converter
- > Can be converted back to a combustion engine, associated documentation included

## OPTIONS

- > Almost any screwing machines can be converted
- > A number of variants are possible
- > Our technical field service is available to assist you

## TECHNICAL DATA

Screwing machine type	To be determined
FC	4.0 kW design IP66w
Motor	2.2 kW
Elect. connection	16 A, 5-pole
