

KEEPING YOU ON TRACK.

FKM SMU EL SCREWING MACHINE CONVERSION

Conversion of your screwing machines to use electric motors

FKM will convert your combustion-driven screwing machine to use an electric drive. This makes the machine quieter and more environmentally friendly for use in tunnels, subways and urban areas.

FC for speed optimization

Simple operation

Low-noise

Environmentally friendly

ADVANTAGES

- > Simple operation, easy starting
- > No exhaust gas in tunnels
- > Reduced noise exposure
- > Speed regulated by frequency converter
- > Can be converted back to a combustion engine, associated documentation included

OPTIONS

- > Almost any screwing machines can be converted
- > A number of variants are possible
- > Our technical field service is available to assist you

TECHNICAL DATA

Screwing machine type	To be determined
FC	4.0 kW design IP66w
Motor	2.2 kW
Elect. connection	16 A, 5-pole
