BORING TOOL FOR CONCRETE SLEEPERS

Our simple and effective solution for boring out broken-off concrete sleeper screws.

Whether slab track, concrete switch sleepers in the check rail area or concrete sleepers of any kind: with the milling cutter included in our set and the appropriate boring tools, broken-off screws that cannot be bored out are a thing of the past.

APPLICATIONS

- > Concrete switch sleepers
- > Track sleepers
- > Slab track

ADVANTAGES

- > Very compact
- > Easy to use
- > Suitable for all typical concrete sleeper screws
- > All components are contained in our FKM tool case
