

KEEPING YOU ON TRACK.

FKM

USP 2.0. light

PORTABLE LIFTING GANTRY

A new level of mobility in track construction

Very low unladen weight

Available in various sizes

Extremely user-friendly

For safely lifting and moving large switch components and rails.

The aluminum construction is lightweight and can be set up without great effort. The USP was developed in close cooperation with railroad engineers as a user-friendly solution that sets new standards for low weight and simple operation.

ADVANTAGES

- > Very lightweight design
- > Heaviest part **only** 22 kg
- > Also suitable for moving conductor rails (third rails).

TECHNICAL DATA

2 meters

Length	2.050 mm
Width	1.000 mm
Height	1.400 mm
Weight	64 kg
Max. load	1.000 kg
Weight of trolley incl. roller rail clamp	15 kg
